

Dear

Congratulations! You've taken the first step toward Futures Trading Success by subscribing to the valuable no-nonsense **Futures Trading Secrets Tips** I promised you.

These tips are the result of over 200,000 time consuming and tedious tests I did to improve my own results. It cost me over \$50,000 to unravel these secrets. Now, because you're a subscriber, much of this gut-wrenching research is available to you for free.

You probably wonder why I would give away such expensive information.

That's easy...it's to benefit both of us.

I want you to see for yourself that the **Futures Trading Secrets Course** truly stands head and shoulders above the crowd. There is no better way for you to sample the no-hype, all meat and potatoes **Futures Trading Secrets Course** than through these powerful tips.

These are real parts of the full course. If you already trade, you can use these tips immediately to help improve your trading even today. Just imagine the success that can be yours when you get the whole course with all the personalized support I give you!

But, I must warn you.

If you're looking to get rich fast with little or no effort, then this is the wrong place for you.

This course is for level-headed people who want a system that works, and who aren't afraid of study, practice, and mental discipline. Plain and simple.

So, if you're willing to invest some honest preparation time then **you can have a lot of fun** with this course and **experience the thrill of winning trades** like multitudes of my other students have.

Sound fair?

If so, let's get started with your first tip...

The Secret of How to Pick Your Indicators

Every trader looks for the perfect signal. Unfortunately, no single Holy Grail signal exists.

The secret to success can be found in a combination of indicators. This gives you a high probability trade setup.

Indicators are tools. As such they serve only one function - to smooth the price. All indicators use a mathematical process to make price easier to understand and in some case create divergences that give you early indication of a market turn or flattening.

Here are some vital keys to remember:

1. Always combine Leading and Lagging Indicators in your approach.
2. Don't use more than five indicators of different types with similar time frames.
3. Your best choice is one indicator from each category below:
 - a. Trend Indicators: MACD, ADX, Moving Average Systems.
 - b. Volatility: These indicators measure the magnitude of day-today price fluctuations: Bollinger Bands, Envelopes, or Keltner Channels.
 - c. Momentum: These indicators measure the speed of price movements MACD, and MACD Histogram, Stochastic, Relative Strength, William's %R, CCI, and RSI.
 - d. Cycles: Many Securities and especially commodities, indexes and currencies have cyclical patterns. Fibonacci Retracements and Fibonacci time cycles and Pesavento Patterns.
 - e. Market Strength: Each Indicator incorporates either volume or open interest: Volume, On Basis Volume, Money Flow, Advance Decline, TRIN, TICK and TIKI: Leading Indicators. We only use TICK and TIKI on our quotes page to measure overall market strength but we don't chart these.
4. For Price Action and Price Patterns: Use candlesticks to measure inside and outside bars, gaps, turning points and reversals. Certain Pesavento Patterns also are good indicators of turning points.
5. Avoid multiple indicators using the same data. If all your indicators only use price and calculate a smoothing function, then the co-linearity will give false signals. Each indicator will give redundant signals and you'll get a false sense of security.
6. Because most indicators are simply variations of the same principle, find two or three indicators that you understand and use them in your trading system.

The Futures Trading Secrets Method- What I Do for My Own Trades

When you get my course, you'll find my exclusive copyrighted system picks three signals for a trading setup. The result gives you **80% accurate setups** for both entries and exits.

You'll Get Powerful Signals Like These with the Futures Trading Secrets Course:

1. An early signal that tells you to get out if your in, or to get ready to get in if your waiting
2. A non-lagging signal that is THE signal for an aggressive entry
3. A confirmation signal that gives you that 80% advantage.

The last point to make for today is to remember...

No signal is perfect.

So, proper money management is absolutely crucial. No system can rescue a trader from poor money management. Proper money management is a vital part of your success in Futures Trading.

This is why I discuss more than just the techniques of trading in my course. I'm not interested in you just buying a course. I want you to succeed.

You see, I've experienced life as a consumer too.

As a result I always swore that if people would place their trust in me enough to invest their hard-earned money on my course, then I would never forget to ***"treat people just like I want to be treated."***

And I've found that's a great way to live.

Therefore, my question to you is,

Why not get the whole Futures Trading Secrets course now?

Look at all you get...

- **13 Separate videos with Twenty (20) hours of interactive market-time training videos on two CD ROMs to help you learn all my signals fast.**
- **Our Exclusive Dual-Time Frame Trading System.**
- Real-time videos comparing approaches to trading the eMini, including: Stochastic Indicator Systems,. Fibonacci Cluster Systems including Pivot Points and Support and Resistance Levels

Your complete dual time trading system with all my trading signals, is delivered to you by Priority or Express Mail (Fedex handles USPS Express Overseas),

*(Testimony) **Averages \$1200-\$1500 per day***

I think your program is the absolute best on the market, I should know because I have purchased so many systems and books over the years.

I promise you won't be disappointed in Bill's system. I've spent a lot of money on systems and books that are in my attic collecting dust right now, and nothing comes close to Bill's material and it's simplicity.

I am doing extremely well with your system My average profit is \$1200-1500 and my best trade to date is \$5,075 with 8 contracts traded three times for the day. Had you sold your system for \$1495 this would still have been a bargain for me.

Thanks, Harold Williams

Not only that, but I give you my personal rock solid

100% Money Back Guarantee

Keep this course for 30 days, trade it, and if you do not think it is worth the money, I will refund your money.

How can I afford to do that?

Because 99% of my clients have kept the system, improved their trading and been entirely satisfied that this is one of the most comprehensive and complete systems on the market at a great price. (The 60 days is a bank requirement, so the refund is always available)

I know that you're going to be happy with the Futures Trading Secrets Course because I work hard to make sure you get your money's worth.

Get started today and you could well be on your way to trading success within a few short weeks.

Oh, I almost forgot to tell you.

Watch for your next Futures Secrets Trading Tip ***"Beware the Mob Mentality of the Market."***

It's coming soon.

Signed,

Bill McCready

(Testimony) ***Spent > \$10,000 on other programs***

Just to drop you a few lines to thank you for the system. I regret for not having to find your system earlier.

I have spent more than ten thousands dollars on a few other systems before taking up your system. They cost a lot more, and yet one will not be able to take money consistently from the market.

Now I have dumped them and I am now using your simple tools to consistently draw money from the market (EMini). It is a lovely experience!

Warmest Regards, Tony Liew, Malaysia
